MASTERING THE ART OF NEUROSURGICAL ON-CALL

Saturday 9th October 2021

University of Glasgow - Wolfson Medical School Building

Endorsed by:

INTRODUCTION

Managing the neurosurgical on-call can be one of the more daunting aspects of the role of a Neurosurgical Registrar. The on-calls may range from managing complex and difficult cases to the often challenging logistical issues which can arise.

Whilst there are courses that cover neurosurgical conditions; operative skills and managing neurosurgical patients, this course specifically addresses these complex and often difficult issues.

AIMS AND OBJECTIVES

The course is aimed at Trainees, ST1 - ST3, providing the relevant knowledge and skills to adequately manage neurosurgical on-calls and ultimately help improve patient care. Content will include:

- What a consultant expects from a junior registrar on-call
- Lessons learned from experienced trainees
- Top tips and how to do well
- The difference between adult & paediatrics
- Cases-based scenarios including the hectic on-call and common logistical challenges

COURSE STRUCTURE

The one day course will consist of lectures, with interactive seminars and simulation.

In order to provide the background knowledge and experience which will then be applied in the case-based discussions and scenario sessions, lectures will be delivered by experts who have several years of experience of on-calls within one of the UK's busiest neurosurgical units - The Institute of Neurological Sciences, QEUH, Glasgow.
